Welcome to EENA

About

EENA, the European Emergency Number Association, is a Brussels-based NGO set up in 1999 dedicated to **promoting high-quality emergency services** in the EU and beyond. EENA serves as a **discussion platform for emergency services, public authorities, decision makers, researchers, associations and solution-providers** with a view to improving the emergency response in accordance with citizens' requirements. EENA is also promoting the establishment of an efficient system for alerting citizens about imminent or developing emergencies.

Today, the EENA community includes **1500+ emergency services representatives** from over **80 countries worldwide**, **100+ solution-providers**, **100+ researchers** and **200+ Members of the European Parliament**. We are proud to be a platform for everyone involved in the public safety community and to provide a space for collaboration and learning.

EENA's Mission

To improve people's
safety and security!

Visit the EENA website for more info:
eena.org

The Conference

Event Overview

From 19 - 21 April 2023, professionals from across the public safety field meet at the EENA Conference & Exhibition in Ljubljana for 3 jam-packed days of inspiring sessions, insightful presentations and innovative exhibitions.

With over 800 participants expected in 2023, the EENA Conference & Exhibition is the place to learn, network, discover new technologies and enjoy valuable time with experts from across the industry. We'll bring you informative and insightful sessions on a variety of topics impacting the sector, from emergency service staff to solutions providers.

From trends in the public safety field, EU legislation updates, retaining staff, the well-being of call-takers to real-life examples of new technology in use, there's truly something for everyone - whether you're an emergency services professional, researcher, solution-provider, mobile network operator, or EU institution representative.

Join us to meet and network with hundreds of your peers and stay at the forefront of public safety expertise and innovations!

Who should attend?

- Emergency services and public authorities,
- Supplier organisations, researchers,
- Telecom regulators, officials from EU institutions
- ...anyone interested in public safety!

100+
speakers

35+
exhibitors

800+
participants

50+
countries

**An open window to expertise
and innovations in the public
safety sector**

**For more info

Information

Participation Fee

The annual EENA Conference & Exhibition is a **free attendance event** for **public authorities' representatives** and **EENA Members**.

Otherwise, should you be:

a company that is NOT a member of EENA

a partner company of a sponsor or exhibitor

EENA will **apply an admission fee** and your request of participation must be sent to the **EENA Events Office**.

The Venue

Overview

Cankarjev Dom (CD) Cultural and Congress Centre is located in the centre of Ljubljana, at a walking distance from the EENA recommended hotels and the attractive Old Town.

With a maximum capacity of 2,000 delegates in the plenary hall, it is the largest purpose-built congress centre in Slovenia and among the most established venues on the international conference market.

Participants can book their hotel accommodation and benefit from EENA's discounted rates through the conference website.

Testimonials

What is said?

TADAS MAROSIKAS
EMERGENCY RESPONSE CENTRE,
DEPUTY DIRECTOR, LITHUANIA

“

The EENA Conference is a great platform to meet counterparts, businesses, brave citizens, and gain new energy for bringing public safety up to a higher level!

”

FREDERIC SEGURET
FIRST AID PROMOTER &
SECOURISME.NET, FRANCE

“

The conference has been very inspiring and the organisation was great, as usual. It was a real pleasure to join the event and

I'm very pleased to be allowed to communicate about the EENA team work to my little community. I am so appreciative of the work done by EENA, the quality of the advocacy and the ethics of your organisation in terms of governance, participation, transparency, expertise and promotion of the general interest, as well as your true good mood and sense of celebration.

”

GREGORY ROHDE

E-COPERNICUS, PRESIDENT & THE NG9-1-1-
INSTITUTE, FORMER EXECUTIVE DIRECTOR, USA

“

It is always such a pleasure for me to be here with the EENA community. Most of all congratulations on not only another successful conference but for being a true global leader in public safety.

EENA and the team have found a winning formula and know how to put on a top notch event. The conference was well organised: very meaningful sessions, great collection of public safety officials and industry leaders, and a great balance of social time to network and time spent in the sessions. Numbers are not the whole story but it speaks volumes that people keep coming back and more and more want to be at EENA each year.

”

JULES LOCKETT

LONDON AMBULANCE SERVICE,
PRACTICE LEARNING MANAGER, UK

“

Firstly, I wanted to say what an amazing amount of people that you managed to attract from far and wide – congratulations on that achievement!

Secondly, thank you for the incredible work that you deliver on, the professionalism of the team and the quality of the presentations. It has been an absolute pleasure to talk about the great work of control room staff, often unsung. There has been so much we have all learnt, my speciality in training and support to colleagues took a different turn when listening to some new sessions about Training and Quality Improvement – so for that, thank you.

We learn something new every day, over EENA2019, we all learnt so much more than that!

”

Benefits

Connect with hundreds of Public Safety Professionals from Europe and beyond

- solution providers
- emergency services
- public authorities
- researchers
- tech companies

Learn Best Practices & New Technological Solutions

- Over 100 leading experts and practitioners will address high-level policy and regulatory matters as well as operational and technical issues
- Every participant will have the opportunity to visit an exhibition area where suppliers will showcase their latest technologies and solutions available

The Network & Growth Possibilities

- Engage and share expertise with peers from the public safety sector coming from 50+ countries
- Reinforce your relationship with existing partners and friends
- Make new friends in an informal atmosphere during the social activities

The Programme

Wednesday, 19 April			Thursday, 20 April				Friday, 21 April		
Introduction & Opening ceremony			2G and 3G shutdown and the potential impact on access to emergency services	Satellite-based solutions for emergency services	"Sorry companies, we made our own software"	Industry Session: Video Communications with PSAPs	What not to do when communicating with the public (working title)		
Plenary: Update on Trends and Legislation								Protecting the well-being of call-takers and the potential for positive psychological outcomes following the transition to NG112	
How to address future challenges on caller location?	Supporting citizens' involvement in the chain of survival BV	Industry Session	Implementing Real-Time Text in EAA Framework	Diversification of Public Warning channels	Should Interactive Voice Response be used to answer emergency	Industry Session: NG112 components	Session to be announced		
	AED Mapping	What data do you need to see?	An international perspective on next generation implementation and operation	Exchange of data between emergency services organisations	Involving citizens in disaster management	Industry Session	Discussion panel / Transition to packet-switched technologies		
							Interactive session		
							Conclusion		
Lunch			Lunch						
Public Warning implementation in France	Defining call-takers question tree	Industry session: Cloud-based CADs	Conveyance of emergency communications to PSAPs via (TPSPs)	Mission Critical Communications	Research Corner	Industry Session: Public Warning Solutions	<div></div> <div>IMPORTANT NOTE</div> <div>This is a provisional programme and it's subject to change.</div> <div>EENA Conference & Exhibition 2023</div> <div>19-21 april, Ljubljana (slovenia)</div>		
Next Generation 112 – Progress update	The great resignation	Industry session: Cloud-based CADs	NextGeneration eCall	Electric Vehicles: new challenges for emergency services, and new opportunities	Emergency communications handling around the World (part 1)	Industry Session: Public Warning Solutions			
Networking Cocktail & Visit of the exhibition			Provision of rich data to emergency services	Successes of PSAP communications	Emergency communications handling around the World (part 2)	Industry session			
112 Awards Ceremony									
Networking Cocktail			Social event						

EENA CONFERENCE 2023 - PROGRAMME

DAY 1: Wednesday 19 April

	Gallus Hall	Kosovel Hall	Stih Hall
09:00 - 09:15	Introduction		
09:15 - 10:15	Update on trends and legislation From the transition to the latest generations of networks to revised rules on emergency communications in the European Union, emergency services are confronted with many changes. In this opening session, we will review today's technological and regulatory challenges and reflect on how we can anticipate these changes and benefit from the opportunities they present. <i>Speakers to be announced</i>		
10:15 - 11:00	Coffee break & visit of the exhibition		
11:00 - 11:45	How to address future challenges on caller location? The wide deployment of AML in Europe has considerably improved over the past years the accuracy of the caller location information provided to PSAPs. However, improvements are still to be made, in the context of new regulatory requirements on Member States to adopt caller location criteria. This session aims at reviewing the current challenges and discussing evolution of caller location technologies. <i>Speakers to be announced</i>	Supporting citizens' involvement in the chain of survival <i>Speakers to be announced</i>	Industry session
11:50 - 12:35		AED Mapping Early use of an AED in out-of-hospital cardiac arrests significantly increases the chances of survival. The mapping of AEDs enables first responders to quickly locate the nearest one. In this session, we look at the findings from research activities regarding ways to improve AED placement and the experience of countries sharing data from one AED registry. <i>Chair to be announced</i> <i>How to improve automated external defibrillator placement for out-of-hospital cardiac arrests - Fabrice Dami, Medical director, Lausanne emergency dispatch (Switzerland)</i> <i>Are first responders first? The rally to the suspected Out-of-Hospital Cardiac Arrest - David Fredman, Operations manager,</i>	What data do you need to see? Innovative technologies are enabling contextual data to be presented to call takers to help inform decision making in the PSAP. As more situational awareness data becomes available from connected device companies and platforms, how do we ensure that it is being delivered and presented in a way that avoids information overload and, instead, empowers call takers by positively impacting workflows, increasing situational awareness and increasing the efficiency of end-to-end operations? Join us to hear from RapidSOS, a company who has partnered with global technology companies across the security, connected vehicle, personal safety and healthcare industries to deliver accurate and relevant data to thousands of PSAPs. Ed Parkinson, President Public Sector,

EENA CONFERENCE 2023 - PROGRAMME

DAY 1: Wednesday 19 April

	Gallus Hall	Kosovel Hall	Stih Hall
		Hearrunner Sweden AB) <i>International AED database - breaking down the borders of Austro-Hungarian Empire - Dr. Gábor Csató,</i> Director ORSZÁGOS MENTŐSZOLGÁLAT (Hungary), Sophia Gebath-Wicho , NOTRUF NÖ GesmbH(Austria)	RapidSOS
12:35 - 14:00	Lunch & visit of the exhibition		
14:00 - 15:00	Combining Cell Broadcast and Location-based SMS - Public Warning implementation in France In 2022, France implemented a public warning system which relies on both cell broadcast and location-based SMS. In this session, we will hear about the technical and operational aspects of the implementation but also how both technologies are being used today. <i>Chair to be announced</i> <i>Title to be announced - Romain Moutard</i> , Lieut, Col., FR-Alert Program Director, Ministry of the Interior (France) <i>How FR-Alert stands out on the European stage ? - Charlotte Thomas</i> , Cloud Offering Director, Intersec <i>Title to be announced - Johnny Douvinet</i> , PhD, Professor, Avignon University (France)	Defining call-takers question tree The fact that a good call-taking protocol is needed isn't really debated anymore. But how can we come up with a good multidisciplinary question tree that respects every discipline's specificity ? In this session, you'll hear from those who have built such protocols and on how they successfully led a project to produce them. <i>Chair to be announced</i> <i>Title to be announced - Martin Edlund</i> , Product Owner CAD-system, SOS Alarm, Sweden <i>Risk analysis as a tool to dispatch: development of the ERC operators question tree - Antti Roms</i> i, Specialist, Emergency Response Centre Agency, Finland <i>Followed by a Q&A session with the audience.</i>	Industry session / Cloud-based CADs
15:05 - 16:05	Next Generation 112 – Progress update	The great resignation Like in other sectors, many PSAPs are currently	Industry session / Cloud-based CADs

EENA CONFERENCE 2023 - PROGRAMME

DAY 1: Wednesday 19 April

Gallus Hall	Kosovel Hall	Stih Hall
<p>Every year, the EENA Conference brings you the latest status of NG112 deployments by highlighting certain projects that are planned or in progress across Europe and where presenters share their insights and experiences on their respective NG112 journeys. In this session we will feature a recently approved project, a work in progress and a fully deployed NG112 solution with a focus on benefits perceived or already realised.</p> <p>Chaired by Brooks T. Shannon Interoperability Program Manager, NENA 9-1-1</p> <p><i>NG112 in Portugal: The future is now!</i> - Vitor Judicibus, Head of Critical Communications Multidisciplinary Team, Ministry of Internal Administration, Portugal</p> <p><i>How Switzerland has implemented NG112 and the benefits already realised</i> - Beat Egger, Management Consultant, Swisscom & Gregor Gysi, Deputy Head, Protection and Rescue Zürich, Switzerland</p> <p><i>NG112: One year on - Experiences and benefits</i> - Igorce Karafilovski, State Advisor for Information Technology, Crisis Management Centre, North Macedonia</p>	<p>facing a high number of resignations and have therefore to deal with difficult conditions to hire and train their staff. In this session, you will hear general views on the underlying reasons for the great resignation and, specifically from an emergency services perspective, best practices on how to cope with this challenge. Hopefully, you will also participate in the conversation!</p> <p>Chaired by Dr. Michelle Lilly, Associate Professor of Clinical Psychology, Northern Illinois University, United States of America</p> <p><i>How to recruit the right skills and attract the best candidates</i> - Michaela Pehrström, HR strategist, SOS Alarm, Sweden</p> <p><i>Overview of recruiting, selection and training processes</i> - Robert Rucăreanu, Head of HR Management Unit & Georgiana Cristina Săbăreanu, 112 Training Coordinator, Special Telecommunications Service, Romania</p> <p><i>Followed by a discussion led by the chair and a Q&A session with the audience.</i></p>	
16:05 - 17:00	Networking Cocktail & Visit of the Exhibition	
17:00 - 18:00	112 Awards Ceremony - (Linhart Hall) Every year, special achievements result in a better protection of the citizens. The 112 Awards Ceremony will recognise and reward some emergency services and citizens for their outstanding contribution to public safety.	
18:00 - 19:00	Networking Cocktail	

EENA CONFERENCE 2023 - PROGRAMME

DAY 2: Thursday 20 April

	Gallus Hall	Linhart Hall	Kosovel Hall	Stih Hall
09:00 - 10:00	<p>2G and 3G shutdown and the potential impact on access to emergency services</p> <p>At last year's conference, Rudolf van der Berg brought to our attention an issue where European roamers could not access emergency services while roaming. This turned out to be an interoperability issue between networks and handsets which is exacerbated when the visited networks have shutdown 2G and 3G services. EENA advocated intensively for a swift and permanent resolution to the issue given the very serious consequences it could have on continuity of emergency communication in Europe. In today's session, we will provide a recap on the issues and discuss recent developments aimed at providing a lasting resolution with representatives of MNOs, MVNOs handset providers and standardisation experts.</p> <p>Chair: Greg Rohde, President, eCopernicus</p> <p>- <i>Speakers to be announced</i></p>	<p>Satellite-based solutions for emergency services</p> <p>From navigation to mapping, satellite solutions have had a major impact on our daily lives. In this session, you will hear about how such solutions can also help emergency services save lives.</p> <p><i>Broadcasting public warning alerts via satellite</i> - speaker to be announced, Stellar project</p> <p><i>Apple's Emergency SOS via satellite</i> - speaker to be announced, Apple</p>	<p>"Sorry companies, we made our own software"</p> <p>Either because they had the skills internally or because they couldn't find the product they wanted on the market, some emergency services have decided to develop their own software. In this session, presenters will take us on their journey of trying to build software to meet their needs, what went well and what went wrong, as well as the pros and cons. Emergency services and private company representatives alike should be keen on attending this session!</p> <p><i>Pros, cons and potential pitfalls when developing your own software</i> - Bernhard Wintersperger, Head of Quality Management for Operations and Training, Austrian Red Cross, Styrian Branch (Austria)</p> <p><i>MDA journey to build a tailor made C4I</i>, Chaim Rafalowski, DMC, Magen David Adom, Israel</p>	<p>Industry session / Video communications with PSAPs</p>

EENA CONFERENCE 2023 - PROGRAMME

DAY 2: Thursday 20 April

	Gallus Hall	Linhart Hall	Kosovel Hall	Stih Hall
10:05 - 11:05	<p>Implementing Real-Time Text in the framework of the European Accessibility Act (EAA) The EAA requires access to emergency services for end-users with disabilities to be “functionally equivalent” to a regular call to 112 and sets a requirement for the implementation of Real-time Text (RTT) by June 2027. In this session we will examine some RTT implementation plans and projects and consider what a functionally equivalent Real-time Text service looks like.</p> <p><i>Presentation title to be announced</i> - nWise (to be confirmed)</p> <p><i>Presentation title to be announced</i> - Michael Kelly, Head of Operations - Emergency Calls Answering Service, BT Ireland</p> <p><i>Presentation title to be announced</i> - European Disability Forum (to be confirmed)</p>	<p>Diversification of Public Warning channels For years, we’ve been talking about sending public warning alerts via telephone networks. If this should remain the channel, other ways to send alerts must also be considered. In this session, we will hear about how to use a proper multi-channel public warning system in the most efficient way.</p> <p><i>Speakers to be announced</i> <i>Presentation title to be announced</i> - Everbridge</p>	<p>Should Interactive Voice Response be used to answer emergency communications? Using Interactive Voice Response (IVR) to support the handling of emergency communications was a taboo until a few years ago when some emergency services started to use it in their operations. Panellists in this session will present some examples of how IVR are used in some countries and will exchange their feedback on whether it has helped authorities meet their objective.</p> <p><i>The Interactive Voice Response (IVR) Unit for Belgian PSAPs: setup and results</i> - Roger Cornelis, Project Manager NCU112, Federal Ministry for Home Affairs, Belgium</p> <p><i>IVR as a solution in case of emergency service overloading and non-critical emergencies</i> - Mihail-Florin Feticu, Head of 112 Unit and Liana-Emilia Muşat, 112 Development Policies Office coordinator, Special Telecommunications Service, Romania</p> <p><i>Session title to be announced</i> - Jörg Reider, Head of Public Safety Solutions, Atos</p>	<p>Industry session / NG112 components</p>

EENA CONFERENCE 2023 - PROGRAMME

DAY 2: Thursday 20 April

	Gallus Hall	Linhart Hall	Kosovel Hall	Stih Hall
			Followed by a panel discussion with the presenters	
11:05 - 11:30	Coffee break & visit of the exhibition			
11:30 - 12:30	<p>An international perspective on next generation implementation and operation</p> <p>NG112 rollout is gathering pace with several projects in progress or in the pipeline. In Europe, regulatory obligations and technology evolution are the key drivers. In North America, where the NG market is more mature, attention is turning to resolving some more complex issues such as ESInet interconnection and cybersecurity. In this session you will hear about the latest next generation developments from across the pond.</p> <p><i>Chaired by Michael Pröstler, CEO, Gridgeras & Vice-Chair, Tech & Ops Committee, EENA</i></p> <p><i>Ensuring Secure, Interoperable Communications with the NG9-1-1 PSAP Credentialing Agency and Forest Guide - Brooks T. Shannon Interoperability Program Manager</i></p>	<p>Exchange of data between emergency services organisations</p> <p>Newcomers to this industry are often shocked by how little data is actually shared among organisations. This session gives the floor to public authority representatives who, through the development of projects and procedures to foster better coordination, have gone beyond the usual "we can't share data with other organisations because it's complicated".</p> <p><i>Early activation: experimentation and results in Piedmont Region's NUE 1.1.2 - Walter Ocelli, Regional Director, and Giacchino Santocono Russo, shift manager and project referent, NUE 112 Regione Piemonte (Italy)</i></p> <p><i>Rules and regulations for sharing information between the emergency centers of Valais - Toufic Saad, Head of project SAE, Cantonal Police of Valais (Switzerland)</i></p> <p><i>One methodology and CAD for</i></p>	<p>Involving citizens in disaster management</p> <p>The Horizon 2020 funding mechanism has fostered the development of a myriad of innovative technologies, perspectives, and strategies to improve emergency management and enhance the involvement of citizens in this process. This session aims to highlight a few of these, and will focus on important issues such as raising awareness, enhancing preparedness, and facilitating communication to citizens.</p> <p><i>Title to be announced - Remy Bossu, EMSC LastQuake, presenting on behalf of the CORE project</i></p> <p><i>Title to be announced, - Presentation on behalf of the NIGHTINGALE project.</i></p> <p><i>Title to be announced - Francesco Graziani, Save the Children- Feel Safe, presenting on behalf of the LINKS project</i></p>	<p>Industry session</p>

E E N A C O N F E R E N C E 2 0 2 3 - P R O G R A M M E

DAY 2: Thursday 20 April

Gallus Hall	Linhart Hall	Kosovel Hall	Stih Hall
Operating a Next Generation Emergency Services Network (ESInet) - John Snapp , Vice-President of Technology, Intrado Life and Safety Inc.	<i>operating and dispatching emergency calls at national level (PSAPs and dispatch centres)</i> - Mihail-Florin Feticu , Head of 112 Unit, and Liana-Emilia Muşat , 112 Development Policies Office coordinator, Special Telecommunications Service, Romania	<i>Title to be announced</i> - David Wales , Crisis communication policy, Presenting on behalf of the ENGAGE project	
12:30 - 14:00 Lunch break & visit of the exhibition			

EENA CONFERENCE 2023 - PROGRAMME

DAY 2: Thursday 20 April

14:00 - 15:05

Conveyance of emergency communications to PSAPs via Third Party Service Providers (TPSPs)

TPSPs provide a vital function in providing assistance to a group of customers, organisations or individuals in circumstances where conventional means of access to emergency services may not work or would not be appropriate. In this session we will hear about the challenges and opportunities in developing effective PSAP-TPSP partnerships and discuss the processes and procedures needed to underpin effective operations.

*Supercharging Emergency services with TPSPs - How to ensure both public safety and citizens benefit from the services TPSPs provide, without overwhelming the emergency response - **Karin Marquez**, Chief Public Safety Brand Officer, RapidSOS*

*Web Services for TPS, Practical Solutions - **Ronnie Riedl**, Control Centre Manager, Mödling site, Emergency Communication & Coordination Centre of Lower Austria*

*Lessons learnt and recommendations from an eCall TPS provider - **Ana Tyssen**,*

Mission Critical Communications

Description to be added

Towards Pan-European Mission-Critical Broadband Communication - speaker to be announced, Frequentis (to be confirmed)

Session title to be announced - TCCA

Research Corner

Academic researchers will present their latest work in the area of public safety. Join us to find out the present and future of research in the emergency services field.

Industry session / Public Warning solutions

E E N A C O N F E R E N C E 2 0 2 3 - P R O G R A M M E

DAY 2: Thursday 20 April

	Gallus Hall	Linhart Hall	Kosovel Hall	Stih Hall
	Global Product and Partner Management, Bosch Service Solutions			
15:05 - 16:05	<p>NextGeneration eCall 112-based eCall has been mandatory for new car models for more than 5 years. In this session we will hear about the evolution of eCall to its Next Generation based on IP. We will be able to know more about NG eCall and how to implement it.</p> <p><i>Speakers to be announced</i></p>	<p>Electric Vehicles: new challenges for emergency services, and new opportunities With the rising prices of oil and with the need to reduce gas emissions, electric car sales are booming across Europe. Firefighters and ambulance services are facing new challenges: how to deal with electricity in case of accidents? How to deal with super hot batteries? Electric vehicles are also more and more used by emergency services themselves: do they represent a viable alternative to thermic vehicles? How to deal with the need for regular and quick charging?</p> <p><i>Chair: Demetrios Pyrros, President, EENA</i></p> <p><i>Don't be afraid of electricity - Andre Baumann</i></p> <p><i>Experiences with electric emergency vehicles in the Norwegian ambulance service - Sven Bruun, Senior Advisor, Department of preparedness & emergency medical services,</i></p>	<p>Emergency communications handling around the World (part 1) Join emergency services from countries across the world and get a comprehensive understanding of their structure, challenges and innovations when it comes to handling emergency communications.</p> <p><i>Speakers to be announced</i></p>	<p>Industry session / Public Warning solutions</p>

of emergency calls and false calls -
Boštjan Tavčar, Head of 112
Centre, Administration of Civil
Protection and Disaster Relief,
Slovenia

19:00 - 22:00

Social event

Join us and colleagues from all over the world for a memorable evening. This is a not to be missed opportunity where you can also enjoy a standing dinner in a special venue in Ljubljana, and have a fun interactive quiz with your peers. More information to be provided soon.

E E N A C O N F E R E N C E 2 0 2 3 - P R O G R A M M E

DAY 3: Friday 21 April

Gallus Hall	
09:00 - 09:40	What not to do when communicating with the public (working title) <i>Session description to be added</i> Keri Stephens , Professor, Department of Communications Studies, University of Texas at Austin (United States)
09:40 - 10:30	Protecting the well-being of call-takers and the potential for positive psychological outcomes following the transition to NG112 Concerns have been raised that the deployment of NG112 in PSAPs could have a negative impact on employees. In this session we will explore strategies for a seamless transition to NG112 that take into account the physical, emotional and psychological wellbeing of calltakers. Chair: Emily Hough , Editor Emeritus, Crisis Response Journal & EENA Board Member Dr. Michelle Lilly , Associate Professor of Clinical Psychology, Northern Illinois University, United States of America
10:30 - 11:00	Coffee break
11:00 - 11:35	Session to be announced <i>Session description to be added</i> Panellists to be announced
11:35 - 12:10	Discussion panel / Transition to packet-switched technologies <i>Session description to be added</i> Panellists to be announced
12:10 - 12:30	Interactive session In this session, the audience will get the chance to vote on the topics that were most relevant during the Conference and to help EENA plan for future events. It is an interactive session, which is always popular with attendees. Participants will vote online from their smartphone or tablet. Gary Machado , Executive Director & Benoît Vivier , Public Affairs Manager, EENA
12:30 - 12:35	Conclusion

We are waiting for you!
